

USER GUIDE – STUDENT OBSERVATION TEMPLATE (MULTIPLE)

ABOUT THE STUDENT OBSERVATION TEMPLATES

These templates can be used by teachers and/or teacher's aides and other support staff to plan, monitor and review the adjustments made for students. They can be used in intervention programs or to document explicit adjustments provided to students in the classroom. The two templates capture similar evidence, but have been tailored to suit the user's needs:

- **Student observation template - Single student:** This template has been designed to capture evidence for an individual student and includes additional fields specific to the student's needs and goals.
- **Student observation template - Multiple students:** This template has been designed to capture evidence for a group of students, such as those in an intervention program.

HOW TO COMPLETE THESE TEMPLATES

There are a few things to be mindful of when completing either of these documents:

- **These templates can complement an Individual Learning Plan or Consultation template in capturing evidence of delivered adjustments.** The fields in the template support schools in capturing evidence of the frequency and intensity of the adjustments being provided to students for a minimum of 10 weeks over the 12 months preceding the NCCD reference date.
- **Changes need not be made when reviewing ongoing adjustments.** While the final column in each template prompts the user to consider any changes to be made in following sessions, if the adjustments are appropriate in supporting the student(s) needs and goals, there is no need to change the nature of the adjustment. This assessment should still be specified in the relevant field.
